

AMS UTILISERV ANNOUNCES MERGER WITH OLAMETER CORPORATION

April 16, 2010 – Monroe, Louisiana – AMS Utiliserv, a utility field services company based in Monroe, Louisiana, today announced completion of a merger with Olameter Corporation, a utility service and technology firm based in Arlington, Texas. Terms of the agreement between these two private companies were not disclosed.

Within this collective organization, field services and related technologies will remain within the AMS Utiliserv structure, with the 250 associated employees continuing their tenure with the company. AMS Utiliserv clients can be assured of on-going quality services, as well as the future availability of additional features. Existing field service offerings include meter reading, meter installations, pole testing, underground locates, and field collections.

Olameter Corporation, meanwhile, will continue providing services surrounding meter data management and presentment, billing, call center, workforce management, and advanced metering infrastructure (AMI) monitoring and maintenance.

“I am confident that the existing synergies between the offerings of Olameter and AMS Utiliserv will allow valuable collaboration in delivering even better service quality and efficiency for our current and potential clients,” commented Ms. Kathy Williamson, Vice President and General Manager.

“AMS Utiliserv is a trusted name in utility field services, and we look forward to working with their team to further enhance offerings and grow the business,” added Mr. Jan Peeters, President. “Combining operational capabilities, experience, and market knowledge will create opportunity for both the company and the customers we will jointly serve.”

About AMS Utiliserv

Since their start in 1995 as a small supplier of meter reading services to an electric utility company, AMS Utiliserv has continued a path of growth within the utility outsourcing market. AMS Utiliserv contributes their success to the quality of services and the ability to assist clients in meeting their customer service and financial objectives. Through partnerships with some of the best materials and software suppliers to the industry, and with access to a well-trained team of professionals, AMS Utiliserv ensures the delivery of quality services and the best options for long-term utility goals.

About Olameter

Olameter provides services and applications to electric, water, and gas utilities, energy retailers, and energy management entities across North America. Established 1998, Olameter has grown to serve approximately 120 clients in 36 US States, 4 Canadian Provinces, and Mexico. Olameter solutions include comprehensive field services, mobile workforce management, billing/CIS applications and services, call center and back-office operations support, ASP data collection, meter data management & presentment, AMI system monitoring & integration, and integration consulting. These offerings are designed to maximize business returns through a proven implementation model that minimizes impact on the client, and assists in achieving deliverables such as improved cash flow, reduced costs, and enhanced customer loyalty.
