

OLAMETER EXTENDS COMMITMENT TO PROVIDING BILLING SOLUTIONS

September 25, 2006 – Olameter today announced the signing of an agreement with Harris Computer Systems that emphasizes Olameter's commitment to provide efficient and cost-effective billing solutions to the utility market place and will deliver even further cost savings to utilities, retailers, and local governments across North America.

As an established provider of utility outsourcing solutions, Olameter has delivered ASP billing services for over four years. Service options include hosting, operations, EBT processing, document fulfillment, call centre services, and collections administration. With the signing of an Enterprise License Agreement, Olameter is able to offer Harris' industry-leading NorthStar billing solution with even further cost saving opportunities to both existing and future clients.

"Considering the widespread movement towards Smart Metering and Time of Use billing, Olameter believes that Harris' NorthStar solution, combined with our flexible operational models and economies of scale bring exceptional value to our utility customers," states Brent Williams, Olameter's Vice President of IT Solutions.

"Harris and Olameter have enjoyed a solid business partnership for many years, and we are excited about the opportunities that this new agreement will bring to both organizations and the customers we collectively serve. Olameter continues to be market leader in the Ontario ASP utility billing market, and we look forward to working with them to leverage this experience and expertise throughout North America," added Craig Ross, Vice President of Business Operations at Harris Computer Systems. "The Agreement will provide Olameter with increased flexibility in its sales and marketing efforts, as well as reposition Olameter to provide more innovative and customer appropriate investment alternatives."

About Olameter

As a leading independent meter service company, Olameter offers a full range of telemetry and back-office systems for electric, gas, and water utilities. Billing, AMR, data collection and management, and automated site management are offered as individual services or in combination as a turn-key solution. Olameter solutions are designed to maximize business returns through a proven implementation model that minimizes impact on the client. As a value-added partner, Olameter currently services over 2.5 million meters across North America and has helped over 65 utilities achieve deliverables such as improved cash flow, reduced costs, and enhanced customer loyalty.
